

CereBrill ADHD wellness solution

Cortechs has developed CereBrill: a platform and apps that help day-to-day management of ADHD.

CereBrill can manage tasks, activities & medication intakes, as well as enabling Secure Video Calls with ADHD Specialists.

It also gives users easy and reliable access to relevant information about ADHD.

An ADHD Personal Progress Plan

With CereBrill, Personal Progress Plans can be recommended to ADHD patients and specialists based on sleep, exercise, and nutrition data captured in our platform and apps.

Take part in our Pilot

We know how challenging the day-to-day management of ADHD is. We would like your help to confirm the impact of CereBrill as an assistive technology

Pilot Ask

- Use the Android app + Fitbit CereBrill app every day for for a period of 3 weeks
- Answer end-of-week questionnaire
- Provide feedback to Cortechs

Pilot Objectives

- Measure impact of CereBrill in managing ADHD
- Measure its the usability in ADHD pathway
- Confirm reliability of predictive behavioral technologies

Pilot Datapoints

- 10 Datapoints per app user
- Usability data: usefulness, impact on day-to-day living, quantifiable progress over 3 weeks periods
- Contextual data: Triage, Wellness questionnaire, and symptoms check
- Health data: movement, sleep patterns, heartbeat, nutrition, attention & focus.
